## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-8 are allowed.
2. The following is an examiner's statement of reasons for allowance: Prior art fails to disclose an X-ray source comprising an electromagnetic electron beam deflector having a U-shape with two legs, the legs being respectively disposed in two tubes proceeding substantially parallel to each other through a projection and being sealed relative to the projection interior, as claimed. Prior art fails to disclose a method for adjusting a position of a focus of an electron beam on an anode in an X-ray tube, comprising the steps of disposing two tubes substantially parallel to each other in the projection and sealing the tubes relative to a projection interior, and inserting respective legs of an electromagnetic U-shaped magnetic field generator in the tubes, as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Barrett (USPN 6,751,293 B1) discloses a cathode in a projection interior of a projection housing but does not disclose a U-shaped magnetic field generator.

Art Unit: 2882
